All About Crystals— Find the Missing & Hidden Words!

Read the sentences below. Visit our Easy Geography for kids page [Crystals](#) to find the missing words. Write them in the empty spaces and find these hidden words in the puzzle!

(Words might be hidden horizontally, vertically and perhaps even back to front...)

1. _____ occur in minerals and other chemical compounds, including sugar, salt and ice.
2. In _____, crystals are created when _____ molten rock or dissolved minerals cool and become solid very slowly.
3. The _____ in minerals cling to each other by electrical forces.
4. When the crystal stick together it can form one of six _____.
5. _____ which resembles a box and has 6, 8 or even 12 sides.
6. _____ or trigonal, which have six or three sides.
7. _____ which looks like a bit like a multi-faced box.
8. _____.
9. Molten is a solid that has melted due to high _____.

Fun Facts about Borax Crystals

1. Borax is actually Sodium Tetraborate.
2. The first Borax mine from the dry lake deposits in Tibet, China.
3. The water can hold more dissolved borax than cold water. That's why we use boiling water to make borax crystals.
4. As the borax solution cools, the water molecules draw closer and bond closer together. As each water molecule is in the water to the dissolved borax. This process is called precipitation. It is what makes the formation of crystals.
5. Borax crystals occur in hot or stable geothermal systems.
6. Borax is considered _____.

Click to Print

Definitions
crystallize: to crystallize a solid, to melt, to solidify or other mineral matter.
Mineral: a solid inorganic substance of natural occurrence.
Precipitate: to cause (something) to become separated from a liquid especially by a chemical process.
Evaporation: to change from a liquid into a gas (which happens in the water when it is heated).
Sedimentary: formed by or from deposits of sediment.
Soluble: to melt, to melt, to change with dissolving to the point where someone can be mineral dissolved or melted.
Crystallization: to cause to form crystals.

How To Make Borax Stars

Artsy Creations

Do real snowflakes melted too quickly? Create a snowflake in Borax crystal, blue coloring if you want and enjoy the glitter all year round! This can be done during the night. Experience level: Beginner Time requested: materials during the night: Borax, water, tube, concepts of transparent jar/kye: crystallization, dissolution, you need a few simple materials to cultivate Borax snowflakes: jar in the mouth lined (pint) foalbourbolaxpelpoling Bottens of food (optional) The first step to create Borax crystal snowflakes is to make the shape of the snowflake. Cut a detergent for three equal sections. Take the sections together in their centers to form a six-sided snowflake shape. Don't worry if the end is not even, just cut to get the desired shape. The snowflake should adapt inside the jar. Tie the rope at the end of one of the arms of the snowflake. Lie the other extremity of the pencil string. You want the length to be such that the pencil mites the snowflake in the jar. Fill the pint of the large mouth with boiling water. Add the spoonful of Borax to the one time to the boiling water, mixing to dissolve after each addition. The quantity used is 3 tablespoons of Borax per cup of water. Okay if a little unusual Borax deposits on the bottom of the jar. If you wish, you can dye the mixture with the color of the food. Hang the more clean snowflake in the jar so that the pencil rests over the jar and the snowflake is completely covered with liquid and freezes freely (it does not touch the bottom of the jar). Leave the jar to sit in an undisturbed position during the night. You can hang your snowflake as a decoration or in a window to capture sunlight, is available in grocery stores in the laundry soap section, such as the team of 20 muli borax laundry booster, do not use boraxo soap, since boiling water is used and since borax is not intended to eat, adult supervision is recommended for this project. If you can't find borax, you can hate sugar or (it can request more time to grow crystals, then be patient.) Add the sugar or salt to boiling water until it stops melting. Ideally, you don't want crystals at the bottom of the vase. Crystal snowflakes make beautiful decorations or ornaments of Christmas tree. It is possible to save the snowflakes to be used from one year to the next, provided they are stored correctly. Borax reacts with water in the air to form a white layer. If this is undesirable, the best way to prevent it from storing the snowflakes in a sealed container with a desiccant. Gently pack every snowy paper flake or paper towel. Place the snowflake wrapped in a zip-top plastic bag. Add a small pack of silica gel. These are included in many products, such as shoes and electronics, so most people have them. Otherwise, the silica gel beads can be purchased in crafts shops. Seal the bag. Find out how to make crystals with 2 basic ingredients for the home. This simple crystal recipe makes rock crystals and is fun for children of all the age with supervision. Crystal experiments work very well in class or at home as a science experiment. Person -easy crystals to do with children when it comes to simple scientific projects for children, making crystals with borax and cleaning tubes never can impress. This is a better situation type of results! How to make Borax crystals making Borax crystals is an experiment of science so cool that we have actually done three times in the past two weeks! Using a form of cleaning pipes such as a foundation allows you to create different forms and crystal formations. Today, we are crystallizing our initials, which we have done orup orup nu "À ehc xarob maeT eluM 02 odnasu omaitS olrenetto evoD e xarob "À asoc ehC ...oC oreisneP à. orob itsopmoc itnatropmi 'Àip ied onu À .oidosid id otarobartet o.oidos id otarobartet.oidos id otarob emoc otuicsonoc ehcna "À xarob .02H01 eÀ 704B2aN acimihc alumrof anu noc elarutan elarenim nu "À xarob "xarob "À'soC .itnegrated ibut elinehc product that is readily available in grocery stores and discount stores. Even though it would take ingesting a large amount of Borax to be toxic, we still recommend adult supervision around any chemical compounds and use caution to not inhale the Borax powder. This post includes affiliate links. Supplies Needed To Make This Borax Crystals Recipe YoucÀÀÀÀ love how easy this process is to set up! All you need are a few common, household ingredients and supplies, and a little bit of patience. How To Make Borax Crystals Step 1: Prep Your Pipe Cleaners The first simple step is to bend your pipe cleaners into whatever shape you want. You can make a crystal snowflake, random shapes, crystal icicles, or like us, everyone can make their own initial. My favorite has to be the crystal snowflakes fashioned out of white pipe cleaners that grow the most beautiful, almost translucent crystal structure. Step 2: Mix Your Borax Solution To make your solution, dissolve 9 tablespoons of Borax in 3 cups of very hot water eÀÀÀ you may be able to use hot tap water if your water gets really hotÀÀÀÀif not.We boiled our water in the kettle first, and poured the boiling water into a 2 qt bowl with a spout. Then we added our borax and we stirred and we stirred!You need your solution to be perfectly clear with no visible traces of Borax, so youcÀÀÀÀ need to stir the concentrated solution for a few minutes making sure there is not Borax powder accumulating at the bottom of the jar. The temperature of the water will be hot! So be very careful with this step. Keep a paper towel handy for any necessary clean ups. Step 3: Start Making Crystals When your pipe cleaners are bent into shape, tie a length of string to the top of each one.Now, pour the borax solution into your jars, and suspend a pipe cleaner in each one by tying the loose end of the string to the handle of a long wooden spoon (or a craft stick or pencil), and laying it across top of the jar.Make sure the pipe cleaner doesn't touch bottom or sides of the jar. Step 4: Wait for Crystal Formation Set the glass jar in a safe place, and leave it for a few hours as the solution cools. When you check back in, youcÀÀÀÀ be amazed to see how quickly the crystals start forming! The next day, our pipe cleaners were gorgeous! The crystal coating was rock hard! When two initials tap into each other, they make a tinkling sound as if they were made of china. I love how the original color of the pipe cleaners looks soft and muted underneath the coating of borax crystals. You can see how this would make a really fun science project for kids at almost any age! Re-Use Your Borax Solution to Make More Crystals YoucÀÀÀÀ likely have lots of crystals that have formed on the sides and bottom of your mason jars. If you want to do the experiment all over again because there is enough dissolved Borax left to create more snow crystals. Just place your jar of left-over solution in the microwave for a minute or two. Stir to dissolve any crystals that adhered to the sides of the container and you are good to go again! Why Do Borax Crystals Form On Pipe Cleaners? If your kids are curious to know HOW the crystals form on your pipe cleaner, we like this simple video explanation from Steve Spangler: Hot water can hold more molecules (the borax) and the molecules move very fast.When the water cools the molecules then slow and begin to settle (on the pipe cleaner).À ÀAs it cools it begins bonding with other borax and begin forming crystals. How Long Does It Take To Grow Borax Crystals? Borax crystals take a little while to form. It generally takes 12-24 hours for the borax crystals to begin forming. The longer you leave them submerged, the bigger the crystals will grow! We loved growing bigger crystals! Big crystals seemed to have different angles almost like you were looking at them with a magnifying glass. How To Make Crystals At Home? Want your crystals to be more unique? Add color! ItcÀÀÀÀs easy, all you have to do is add a few drops of your favorite colored food coloring to the water. Add a different color to each jar and youcÀÀÀÀ have different colored borax crystals. What is the Difference Between Salt Crystals, Snow Crystals and Borax Crystals? You can also grow salt crystals with table salt. Epsom salt or even sugar! Salt crystals look different because they are cube shaped. In fact, most minerals occur as crystals which appear in a pattern that repeats over and over. eÀÀÀThe shape of the resulting crystal-such as a cube (like salt) or a six-sided form (like a snowflake)-mirrors the internal arrangement of the atoms.eÀÀÀeÀÀÀSmithsonian Education, The form of Crystals and the Building Blocks of Minerals The shape of Borax crystals are more intricate: eÀÀÀA solid with flat sides and a symmetrical shape because its molecules are arranged in a unique, repeating pattern.eÀÀÀ-Unknown, but often quoted on the internet and I never found original source eÀÀÀ if you know, please mention it in the comments so I can give credit borax very hot water jar spoon chenille pipe cleaners string pencil or craft stick (optional) Bend your pipe cleaners into whatever shapes you want. You can makeÀ Àsnowflakes, random shapes,À Àcrystal icicles, or like us, everyone can make their own initial.When your pipe cleaners are bent into shape, tie a length of string to the top of each one.To make your solution, dissolve 9 tbsp of Borax in 3 cups of very hot water. We boiled our water in the kettle first, and poured it into a 2 qt bowl with a spout. Then we added our borax and we stirred and we stirred!Now, pour the solution into your jars, and suspend a pipe cleaner in each one. You can do this by tying the loose end of the string to the handle of the spoon (or a craft stick or pencil), and laying it across the top of the jar. Make sure the pipe cleaner doesn't touch the jar.À Àxarob "xarob noc illatsirc eraf e rararapm i otatrev id it 'Àsac ni itat illatsirc eraf a azneirepse aut al atats 'e moC !itrepoc omaibba iT 'inibmab i rep azneics id otnemirevid e azneics id itnemrepse 'Àip id acrecir aIÀ inibmab rep itnetrevid 'Àip azneics id itnemrepseE .omaima ehc ollatsirc id tik inucla occE .olager nu emoc azneics id otnemirepse otseug erad rep odom nu o erlaf 'Àip id atosclauq aredisid e etlov a am ,attircsed arap METS Àtívitta! noc xarob !llatsirc i etnemlicaf eravitoc ellibisop 'À inibmab rep azneics id enoizavttloc al rep tik .itunim inucla rep eralocsem etlervod idniug .xarob id ilibisv ecart aznes orahc etnemattrefp eresse rep enoizulos artsov alled onqisib etevA .etton al rep isredes ortson l ehc omaicсал am ,ecarob auqca'llen ibut itnegrated itrsov i eraicсал id oleuq "À otailgnisoc elae opmet l ehc orucis onos noN !isramrof a onainzi illatsirc i etnemadipar otnaug eredevid itiputs eteras ,orteidni anrot is odnauQ .aro ehclaug rep olaiscal e orucis otspou nu ni ollotarrab li itteM .osav led ital o odnoF
